

BOREHOLES CORRELATIONS

SECTION 2 (ZONE 2)

fig. SM1.2b - correlation between boreholes stratigraphies related to Zone 2 (see figs. 3.1, 5.2b, § 5.2.2). The red line represents the certain (continuous) and inferred (dashed) basal contact of the LSU over the foredeep units; the green line represents the certain (continuous) and inferred (dashed) contact between the Ligurian and Subligurian units.
